Student components

Reusable cards, chips, status indicators and AI suggestions for the student side of DARB. Every component is built from the DARB palette, IBM Plex Sans and Noto Sans Arabic, and the outline icon set, with English (LTR) and Arabic (RTL) versions.

1. Research and component requirements

What each component must show, and the states it needs. These come from the brand boards and the task list.

Component	Information needed	Variants and states
Opportunity card	Type, title, organization, location and mode, deadline, save, details action. Optional: skills, match score	Default, saved, deadline soon, closed, compact, recommended; EN and AR
Recommended opportunity	Card fields plus match score and reason	Carousel item, with and without score
Category	Icon, label, optional count	Default, selected
Profile	Avatar, name, university, major, completion	Default, incomplete, complete
Skills and interests	Label, remove, add	Read-only, selected, removable, add, suggested, empty
Saved opportunity	Card fields plus remove	Active, expired
Application status	Status label and icon	Draft, submitted, under review, interview, accepted, not selected, withdrawn
Application tracking	Step name, date, state	Done, current, upcoming
Deadline reminder	Date, time left, urgency	Neutral, due soon, closing today, closed
AI recommendation	Card fields, match reason, feedback	Default, feedback given, dismissed

Suggested skills	Skill, source, accept and dismiss	Suggested, accepted, dismissed

Inputs from the brand boards

- Colors only from the DARB palette. Status colors are always paired with an icon and text.
- Text uses the existing nine styles. Body text stays at 14px or larger. No uppercase or letter-spacing in Arabic.
- Outline icons at 16, 20 or 24px, at least 8px from text, with a 44 × 44px touch area when tappable.
- Arrows, chevrons, back and logout icons mirror in Arabic. Search, clock and check do not.

Accept all Dismiss

Suggested chips use a dashed outline so they never look like confirmed skills. Accept moves the chip to the skills list. Dismiss removes it and stops suggesting it.

6. Documentation

Figma component	Properties	Usage
`Card/Opportunity`	State: default, saved, soon, closed · Type: 5 types · Layout: full, compact · Lang: EN, AR	Browse, search, Home feeds
`Card/Recommended`	Match: on, off · Reason: text	Home carousel
`Chip/Category`	State: default, selected · Count: on, off	Filters on Explore
`Card/Profile`	Completion: 0–100 · Lang	Profile tab, Home header
`Chip/Skill`	Type: read-only, selected, removable, add, suggested	Profile, forms, AI suggestions
`Card/Saved`	State: active, expired	Saved tab
`Pill/Status`	Status: 7 values · Lang	Applications list, detail
`Stepper/Application`	Step state: done, current, upcoming	Application detail
`Banner/Deadline`	Urgency: neutral, soon, today, closed	Cards, detail, Home
`Card/AI-Recommendation`	Feedback: none, helpful, dismissed	Home, Explore
`Card/Suggested-Skills`	Chip count: 1–6	Profile, onboarding

Rules for every component

- Build with auto layout. Use color and text styles, never raw values or hand-set font sizes.
- Swap icon instances from the library. Do not redraw icons.
- Every EN component has an AR twin with the AR text style, mirrored layout and mirrored directional icons.
- Icon-only buttons need an accessible label. Tap targets are at least 44 × 44px.
- AI content is always labeled and always dismissible.

Open items for the team

- The icon library has no AI or sparkle icon. This page uses `featured` (star) until one is added.
- The palette has no info status color. In-progress states use Light Teal.
- Confirm the Secondary Text hex. It is cropped in the board, so `#5B6772` is a placeholder here.
