Research and Component Requirements

Student Components · Responsible member: Dana

Purpose

Define what the student-side components must show and do before they are built in Figma. Requirements come from the task list and the three DARB brand boards (color, typography, icons).

Constraints from the brand boards

- **Color:** Primary Blue #173B57, Secondary Teal #176B6B, Light Teal #D9F0ED, Background #F6F8FA, Main Text #202B35, Border #DCE3EA. Status: Success #247A4B, Warning #9A6500, Error #B42318.
- **Type:** IBM Plex Sans (English) and Noto Sans Arabic. Use only the nine text styles. Body text 14px or larger. No uppercase or letter-spacing in Arabic.
- **Icons:** outline only, 16, 20 or 24px, 8px minimum gap to text, 44 x 44px touch area when tappable. Arrows, chevrons, back and logout mirror in Arabic. Search, clock and check do not.
- **Status:** never rely on color alone. Always pair with an icon and text.

Information needed in an opportunity card

- **Must have:** opportunity type, title, organization, location and mode (for example Doha, Hybrid), application deadline, save toggle, details action.
- **Should have:** posted date, closed state, skill tags.
- **Recommended and AI cards add:** match score and a short reason such as "Matches your UX and Figma skills".

Component requirements

Component	Information needed	Variants and states
Opportunity card	Type, title, organization, location and mode, deadline, save, details action. Optional: skill tags, match score.	Default, saved, deadline soon, closed, compact, recommended. EN and AR.
Recommended opportunity	Card fields plus match score and a reason line.	Carousel item, with and without score.
Category	Icon, label, optional count.	Default, selected.
Profile	Avatar, name, university, major, completion percentage.	Default, incomplete, complete.
Skills and interests	Label, remove, add.	Read-only, selected, removable, add, suggested, empty.
Saved opportunity	Card fields plus remove action.	Active, expired.
Application status	Status label and icon.	Draft, submitted, under review, interview, accepted, not selected, withdrawn.

Component	Information needed	Variants and states
Application tracking	Step name, date, step state.	Done, current, upcoming.
Deadline reminder	Date, time left, urgency.	Neutral, due soon, closing today, closed.
AI recommendation	Card fields, match reason, feedback actions.	Default, feedback given, dismissed.
Suggested skills	Skill, source of suggestion, accept and dismiss.	Suggested, accepted, dismissed.

Open items

- The icon library has no AI or sparkle icon. The star (featured) icon is used until one is added.
- The palette has no info status color. In-progress statuses use Light Teal.
- The Secondary Text hex is cropped in the brand board. #5B6772 is a placeholder. Confirm the real value.

Component Documentation

Student Components · Responsible member: Dana

Overview

Reusable components for the student side of DARB. Each component uses DARB color and text styles, outline icons from the icon library, and has English (LTR) and Arabic (RTL) versions.

Component reference

Figma component	Properties	Usage
Card/Opportunity	State: default, saved, soon, closed. Type: internship, competition, volunteering, event, course. Layout: full, compact. Lang: EN, AR.	Browse, search and Home feeds.
Card/Recommended	Match: on, off. Reason: text.	Home carousel.
Chip/Category	State: default, selected. Count: on, off.	Filters on Explore.
Card/Profile	Completion: 0 to 100. Lang: EN, AR.	Profile tab, Home header.
Chip/Skill	Type: read-only, selected, removable, add, suggested.	Profile, forms, AI suggestions.
Card/Saved	State: active, expired.	Saved tab.
Pill/Status	Status: 7 values. Lang: EN, AR.	Applications list and detail.
Stepper/Application	Step state: done, current, upcoming.	Application detail.
Banner/Deadline	Urgency: neutral, soon, today, closed.	Cards, detail, Home.
Card/AI-Recommendation	Feedback: none, helpful, dismissed.	Home, Explore.
Card/Suggested-Skills	Chip count: 1 to 6.	Profile, onboarding.

Behavior notes

- **Save:** the bookmark toggles between default and active (Light Teal background, Secondary Teal icon). Announce the change with an accessible label.
- **Deadline:** neutral when more than 7 days away, Warning Amber when due soon, Error Red when closing today or closed. Always show an icon and text.
- **Closed cards:** reduced emphasis, disabled details action, "Closed" label with an icon.
- **AI content:** labeled "Suggested by DARB AI", shows a reason, and can be dismissed. Suggested skills use a dashed outline so they never look confirmed.

Build rules

- Use auto layout, color styles and text styles. Never set raw hex values or font sizes by hand.
- Swap icon instances from the library. Do not redraw, stretch or rotate icons.

- Every EN component has an AR twin with the AR text style, mirrored layout and mirrored directional icons.
- Icon-only buttons need an accessible label. Tap targets are at least 44 x 44px.
- Keep at least 8px between an icon and its text.
- Keep numbers consistent per screen (Arabic-Indic or Western).

DARB Student Components

Reusable student-side interface components | Responsible member: Dana

Purpose

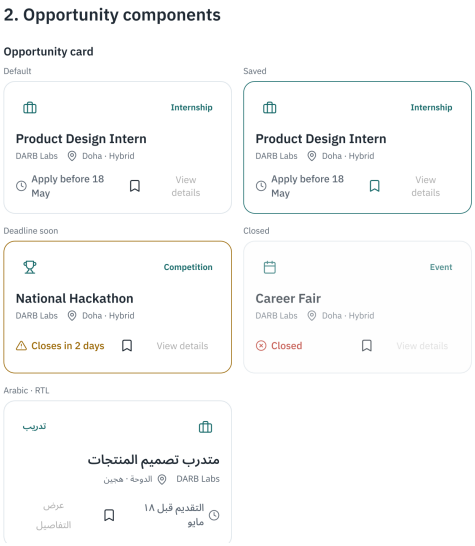

Design reusable components that help students discover opportunities, manage their profiles, save opportunities, and follow application progress. All components follow the DARB design system and support English (LTR) and Arabic (RTL).

1. Opportunity components

Opportunity cards: Show title, organization, type, location, mode, deadline, and actions to save or view details. Variants include default, saved, deadline soon, closed, and compact.

Recommended cards: Add an AI match score and a short reason explaining why the opportunity fits the student's skills or interests. Intended for the Home carousel.

Category chips: Show an icon and category label, with default and selected states; optional counts can show the number of opportunities.

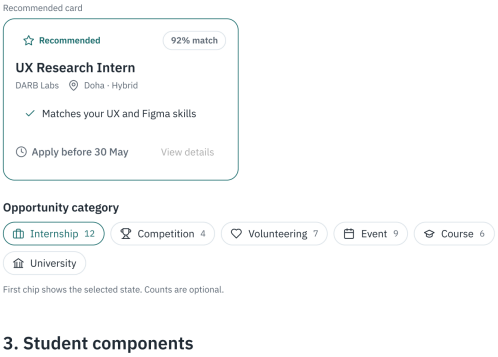

2. Student components

Profile summary: Display avatar or initials, name, university, major, and profile completion, with an edit action.

Skills and interests: Reusable chips with read-only, selected, removable, add, suggested, and empty states.

Saved opportunities: Compact saved cards with active and expired states and a bookmark indicator.

DARB Student Components

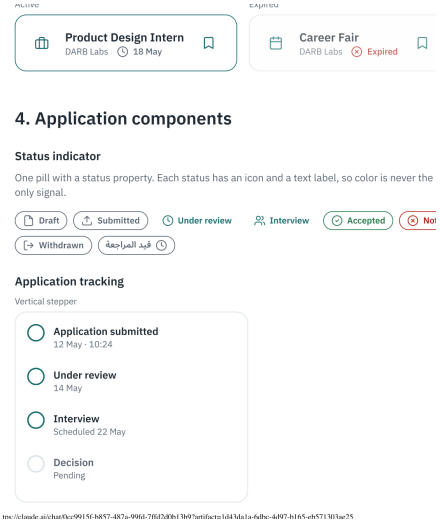

Application, AI, documentation and design standards

3. Application components

Status indicators: Labeled pills for Draft, Submitted, Under Review, Interview, Accepted, Not Selected, and Withdrawn. Each status combines an icon and text with its color.

Application tracking: A vertical stepper showing stages, dates, and completed, current, or upcoming progress.

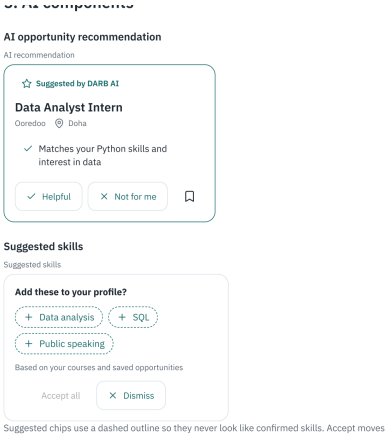

Deadline reminders: Banners for normal, due-soon, closing-today, and closed deadlines.

4. AI components

AI opportunity recommendations: Include an AI label, opportunity details, match explanation, and Helpful / Not for me feedback.

Suggested skills: Dashed-outline chips based on courses and saved opportunities. Students can accept suggestions into their profile or dismiss them.

5. Design standards

- Use only the DARB palette and approved text styles: IBM Plex Sans for English and Noto Sans Arabic for Arabic.
- Use outline icons from the library (16, 20, or 24px); keep at least 8px between icon and text.
- Build with Figma Auto Layout, reusable styles, and component properties.
- Provide EN and AR versions. Mirror directional icons in Arabic; do not mirror search, clock, or check.
- Interactive touch targets must be at least 44 × 44px. Status colors must always appear with an icon and label.
- AI content must be clearly labeled and dismissible.

Team items to confirm

The AI/sparkle icon is not yet available, so the featured star is used temporarily. Light Teal represents in-progress states because there is no information status color. The Secondary Text color #5B6772 is provisional and needs confirmation.

Deliverables

Research and component requirements • Student UI component designs • Component documentation • Reusable Figma components and variants • Final screenshots
